

## **REFLECTION**

### **TIS and PC Assembly**

Reflecting on the subject of Technology and Information Systems, particularly the activity of PC Assembly, it's clear that this hands-on experience has provided a profound understanding of the intricate workings of computer systems. Assembling a PC from scratch not only demystified the complex structure of a computer but also instilled a sense of accomplishment and confidence. It was fascinating to see how each component, though individually simple, contributes to the overall functionality of the system when interconnected. This activity underscored the importance of precision, attention to detail, and problem-solving skills, as even a minor oversight could lead to significant issues. Furthermore, it highlighted the rapid evolution of technology and the necessity to continually update one's knowledge to keep pace with advancements. Overall, this experience has enriched my comprehension of the subject and has sparked a deeper interest in exploring further into the realm of Technology and Information Systems.
